“Comments: Energy Tax Reform Working Group”

Alice McKay Barnett

Please do not extend the PTC for the WIND industry. I live in Maine and the WIND industry is not only ruining our ice-age ecosystems on our mountains but is causing our electrical rates to increase.

New England has the opportunity to buy hydro power from Canada. The mandates in New England are causing NEW renewables to replace existing renewables. I especially do not want to have “stranded” costs added to electrical rates.

Thank You
